Why VENUS HIPER?

Compare It with Conventional RF Devices!

Conventional RF

Surface-Level Heating

Limited Effect Due to Shallow Heat Penetration

Fixed Output System

Constant Energy Output Regardless of Skin Condition

Strong Stimulation

Localized Overheating May Cause Discomfort

Focused Mainly on Skin Care

Primarily for Basic Skin Tightening

Direct Metal Contact

Possible Risk of Burning and Irritation

VS

VENUS HIPER

Deep Heat Energy Delivery

Supports Musculoskeletal & Inflammatory Care

Real-Time Impedance Control

Automatically Adjusts Energy by Detecting Body Resistance

Comfortable & Safe Care

Minimizes Irritation with Even Heat Distribution

Condition Care + Beauty + Body Care

Supports Recovery, Skin Tightening, and Body Slimming Care

Insulated Coated Probe

Designed for Enhanced Safety with Minimal Side Effects

Designed for Deeper, Safer, and More Effective Care!

How Is Deep Heat Generated?

4.4MHz electric field energy reaches the fat layer, making it optimized for body slimming and condition care.

Condition Care

Skin Elasticity Improvement

Improved Blood Circulation

Muscle Relaxation

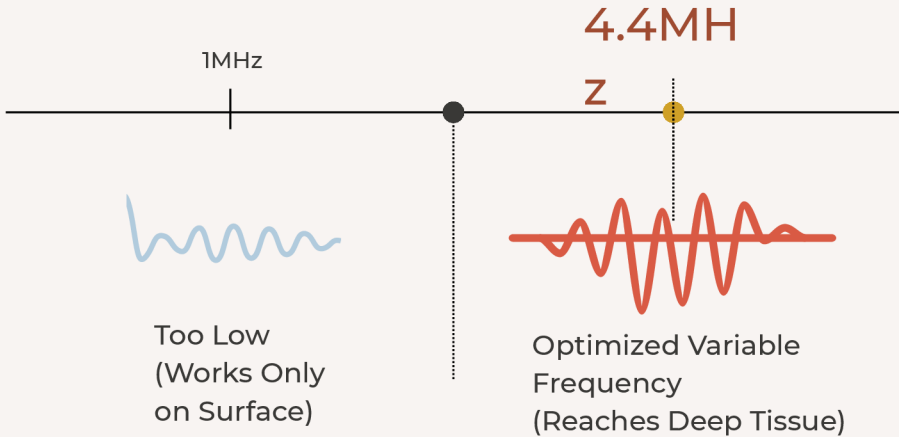

Body Contouring Care

4.4MHz, Optimized Variable Frequency

Deeper, Safer, and More Effective

[Conventional Device]

[VENUS HIPER]

- ✓ Deep Energy Reaching Muscle Layers
- ✓ Safe Heat Delivery Without Tissue Damage
- ✓ Natural Collagen Regeneration & Elasticity Improvement
- ✓ Helps with Cellulite Care & Body Slimming
- ✓ Effectively Manages Body Lines by Reaching Fat Layers
- ✓ Effective for Condition Care & Recovery Management

A-IPM Real-Time Impedance Control System

Automatically adjusts energy by continuously detecting body resistance.

Product Specifications & Certifications

Product Specifications

Model Name	VENUS HIPER
Frequency	4.4MHz 30%
Weight	12kg
Power Consumption	150~230 VA
Electrical Rating	AC 220~240V, 50/60Hz
Type and Degree of Protection	Class I Equipment, Type BF Applied Part
Certifications	CE / ISO13485

Certifications

ISO 13485:2016
LL-C (Certification)
